

Dear Hiring Team,

I am very excited to apply for the Regional Director Sales Engineering DACH / CER role at Check Point.

Throughout my career at VMware by Broadcom and Citrix, I have led Sales Engineering organisations across EMEA, with a strong focus on enterprise environments where cybersecurity and infrastructure are deeply interconnected.

I have extensive experience working with enterprise and channel partners, supporting complex architectures and aligning technical solutions with security and compliance requirements.

At VMware, I worked closely with enterprise customers on cloud and hybrid infrastructure solutions, often in environments where security considerations were critical. At Citrix, I supported secure application delivery and access use cases, enabling organisations to protect critical systems while ensuring performance and usability.

In addition, I have led regional and global Sales Engineering teams, introduced structured engagement frameworks, and improved consistency in technical deal execution. I have also implemented data-driven performance systems that provided leadership visibility into readiness, capability, and effectiveness across teams.

The opportunity at Check Point strongly resonates with my experience, particularly the combination of regional leadership, cybersecurity focus, and enterprise customer engagement. I am especially motivated by the chance to contribute to Check Point's leadership in cybersecurity while building and scaling a high-performing Sales Engineering organisation across DACH and Central Eastern Europe.

I would welcome the opportunity to bring my experience in Sales Engineering leadership, enterprise security environments, and technical deal execution to Check Point.

Kind regards,
Markus Klein

Role: Regional Director Sales Engineering DACH / CER at Check Point

PROFILE

Senior Sales Engineering leader with 25+ years of experience building and leading technical sales organisations across DACH, Eastern Europe and EMEA.

Former Senior Director at VMware and Citrix Systems, with strong experience in:

- Regional Sales Engineering leadership (DACH / EMEA)
- Driving technical win strategies in complex enterprise deals
- Enterprise architecture across cloud, infrastructure, and security environments

Proven track record of enabling organisations to secure enterprise environments while driving revenue growth through high-quality technical engagement.

CORE CAPABILITIES

- Hands on Sales Engineering Leadership
- Enterprise Deal Execution (Workshops, POVs)
- Technical Win Strategy & Competitive Positioning
- SE Org Scaling & Talent Development
- Infrastructure & Cybersecurity Positioning
- Operational Governance & KPI Systems

PROFESSIONAL EXPERIENCE

Broadcom (VMware Division)

Regional Executive Leader, Solutions Engineering – EMEA | 2023–2025

Scope: 30+ EMEA Partner & Commercial Presales Team | Rebuilt regional governance and accountability post-acquisition

- Strengthened governance and engagement models during acquisition transition
- Delivered sustained pipeline creation and execution to overachieve revenue targets
- 200% overachievement in first year after take over

VMware

Senior Director, Solutions Engineering – Central Europe | 2014–2023

Scope: 180 engineers | 20 leaders | €1.000M+ annual revenue support

Executive Leadership Across CEMEA Technical Organisation

- Led large, distributed enterprise SE teams across multiple regions
- Partnered with senior sales leadership to align technical strategy with revenue goals

Impact:

- Ensured consistency and quality of enterprise customer engagements
- Improved alignment between technical teams and sales strategy

Infrastructure & Cybersecurity Leadership

- Supported enterprise customers with cloud, infrastructure, and security-sensitive architectures
- Worked closely with customers in regulated industries and complex environments

Impact:

- Built strong credibility in transitional IT enterprise environments
- Enabled positioning of solutions aligned with compliance and feasibility

Driving Enterprise Platform Adoption

- Supported enterprise customers in adopting cloud, infrastructure, and data-driven platforms
- Led executive-level engagements with C-Level and technical stakeholders

Impact:

- Accelerated adoption of enterprise platforms in complex environments
- Strengthened relationships in strategic accounts

Data-Driven SE Operating Model

- Built an EMEA capability framework linking skills, certifications, and career progression
- Implemented Salesforce dashboards for leadership visibility

Impact:

- Enabled SE to operate as a measurable business function
- Improved decision-making and performance management

Citrix Systems

Director, Systems Engineering – Central Europe | 2000–2014

Scope: Systems Engineer, Teamlead, Manager and Director

Built High-Performance SE Teams

- Led and developed SE teams across regions and all customer levels

- Implemented coaching and performance frameworks

Impact:

- Improved team productivity and technical consistency
- Strengthened collaboration between Sales, Product, and Delivery

Cross-Functional & EMEA Alignment

- Acted as bridge between Sales, Product, and Engineering

Impact:

- Improved coordination across global teams
- Improved alignment between product capabilities and customer requirements

Built High-Performance SE Teams

- Led and developed SE teams across regions and all customer levels
- Implemented coaching and performance frameworks

Impact:

- Improved team productivity and technical consistency
- Strengthened collaboration between Sales, Product, and Delivery

EXECUTIVE LEADERSHIP APPROACH

- Build and lead high-performing enterprise technical sales teams across EMEA regions
- Scale repeatable GTM execution across diverse international markets
- Design scalable technical sales operating models
- Align solution engineering with measurable business and revenue impact
- Goto Market frameworks for existing and newly added solutions
- Continuously keep attrition to <5% via people centric leadership approach
