Dear Hiring Team,

I am writing to express my interest in the VP Solution Advisory EMEA position at Icertis. The role combines two things I have spent my career doing: building and leading high-performing Solution Advisory organizations across EMEA, and remaining personally engaged in the customer opportunities where executive presence and platform credibility are decisive.

Over more than 25 years at VMware, Broadcom, and Citrix, I have led and scaled presales organizations — most recently rebuilding a 30+ person EMEA Solutions Engineering team from the ground up following the Broadcom acquisition of VMware. We re-established team structure, coverage model, and Sales partnership within months, and delivered 200% of target in the first year. Earlier at VMware, I successfully developed a set of new customer workshops based on Design Thinking, to drive net new business and expand customer relations beyond a standard vendor-buyer relation.

In both cases the motion was the same: a Solution Advisory team fully accountable to revenue, tightly aligned with Sales, Marketing, and Customer Success, and credible in front of C-level buyers on complex, multi-stakeholder platforms — exactly the model your VP role calls for.

I am attracted to Icertis because contract intelligence is one of the few genuinely transformational enterprise platforms: it sits simultaneously at the intersection of revenue growth, cost control, risk, and compliance — making it a strategic C-level conversation from the first meeting. That plays directly to the kind of Solution Advisory engagement I have led throughout my career, where the most effective customer interactions connect platform capabilities to the client's strategic outcomes rather than their functional requirements alone. I see meaningful opportunity to apply that discipline to Icertis's continued EMEA expansion.

I am originally from the Frankfurt region and continue to spend considerable time there, so the role's base in Frankfurt am Main is both professionally and personally a natural fit.

My leadership philosophy centres on second-line accountability: I lead through trusted managers who own their sub-teams, which scales coaching impact and has consistently kept attrition below 5% even through major organizational change. I simultaneously stay directly involved in key customer opportunities — not as a bottleneck, but as a senior resource who opens doors and moves deals forward. I hold teams accountable to both pipeline contribution and the quality of customer engagement at the executive level.

I would welcome the opportunity to discuss how my background aligns with Icertis's ambitions for the EMEA region and am available at your convenience.

Kind regards,

Markus Klein
